

know about.me

the web profile generator

Students: Varun Arora (varora), Ghanim Al-Sulaiti (gsulaiti)
Advisor: Dr. Peter Bowman

Objectives

- Facilitating quick, simple and efficient social networking without the need of identity maintenance on multiple ambiguous online social networks.
- Allowing all web users to maintain static & public web-page based profiles without the need to learn web design.
- Giving complete control to Social network users while communicating a personal profile over the Web.

Project

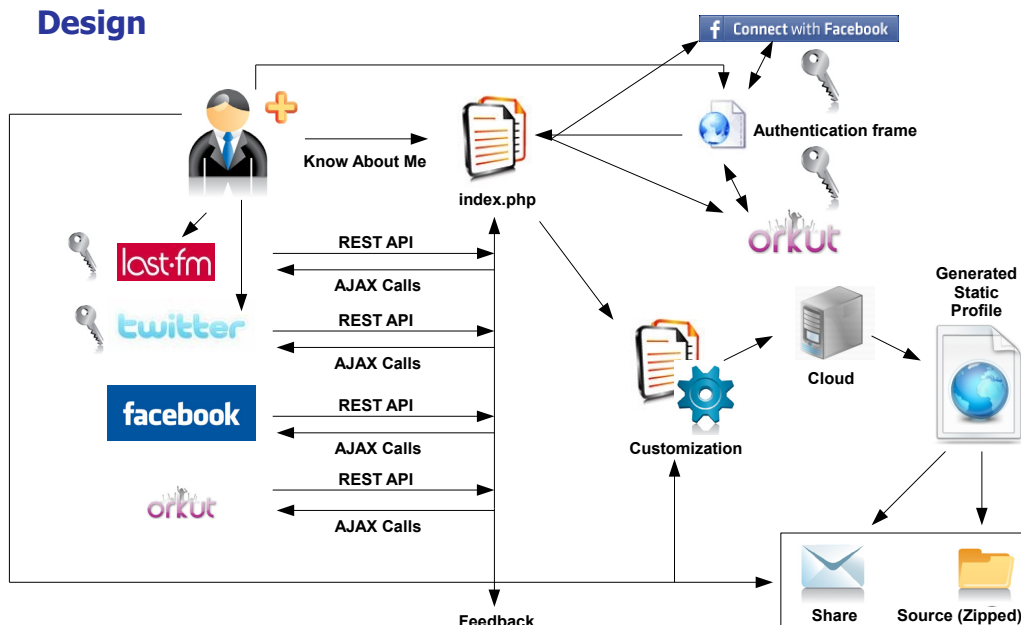

To be able to generate static web profiles using aggregated user content and information...

- ...retrieved from user profiles on Social Networks and Web applications with content-access capability (authenticated or unauthenticated access)
- ...after selective customization of data on user needs
- & being able to use the generated web profiles for enhancing a web identity in multiple ways

Supported Networks

- Facebook
- Orkut
- hi5
- YouTube
- Blogger
- Last.fm
- Twitter

Design

Development Pipeline

- Support for short-"post it" URLs
- Extensions for larger number of social networks
- Better customization control
- Feedback and Support
